## • ABOUT THE PROJECT

You can run a large office or small business with this HRMS software

Human resources management is a very important function in every organization. HRMS can help with critical HR tasks efficiently—such as salary payouts, tax deductions, employee performance, leave encashments. "Walton HRMS" software streamlines of these processes, reducing the chances of human errors and malpractices while collating the data.

Targeted Audience: 24–60 Years

Duration: 02 Months

Client : Walton Group

Tools: Figma, Adobe PS, Adobe AI

Role: Idea, Problem Solving, UI & UX

## • THE PROBLEM

HRMS facilitates the safe and efficient storage of employee data. With the help of HRMS, an HR representative can easily process employee information on the system without wasting much time doing the paperwork. Plus, the software system is an efficient way to store and recall employee data as and when required.

## • THE SOLUTION

Cloud based HRMS solution. A complete solution for attendance & payroll. Get access your HR data anytime, anywhere with this HRMS app. With this pocket app you can control and track all of your HR data

## DESIGN PROCESS

## Research

- User Research
- Competitor Analysis

## Define

- Empathy Map
- Analysing F&G

## Ideate

- Initial Ideas
- Task Flow
- Information Architecture

## Design

- Color Scheme
- Typography
- Wireframes
- Final Screens

## Recollect

- Challenges
- What I Learnt
- Can be Improved
- What's Next

## • COMPETITOR ANALYSIS

Digigo Sheba

PiHR

ZenHR

After personally using & observing the above apps, I identified the major challenges. After this analysis I also seriously read the many people google reviews.
